

SOILGUARD NETWORK OF KNOWLEDGE

WORKING TOGETHER FOR HEALTHIER SOILS

SOILGUARD aims at co-creating a framework with the potential to become the global standard for future assessments of soil biodiversity status and its contribution to soil multifunctionality and human wellbeing. Thus, creating the evidence to fill the gaps of knowledge and quantify the environmental, economic and social consequences of unsustainable soil management. All knowledge will be shared through the SOILGUARDIANS App, a predictive tool based on the causal links between soil biodiversity, its multifunctionality and wellbeing to support stakeholders on the transition to sustainable management. The SOILGUARD's network of knowledge and the connectivity enabled by SOILGUARDIANS app will create an ecosystem of innovation for key stakeholders to showcase, learn and share experiences.

WHY? Improve the science and society dialogue

WHAT? Collaboration space for soil health

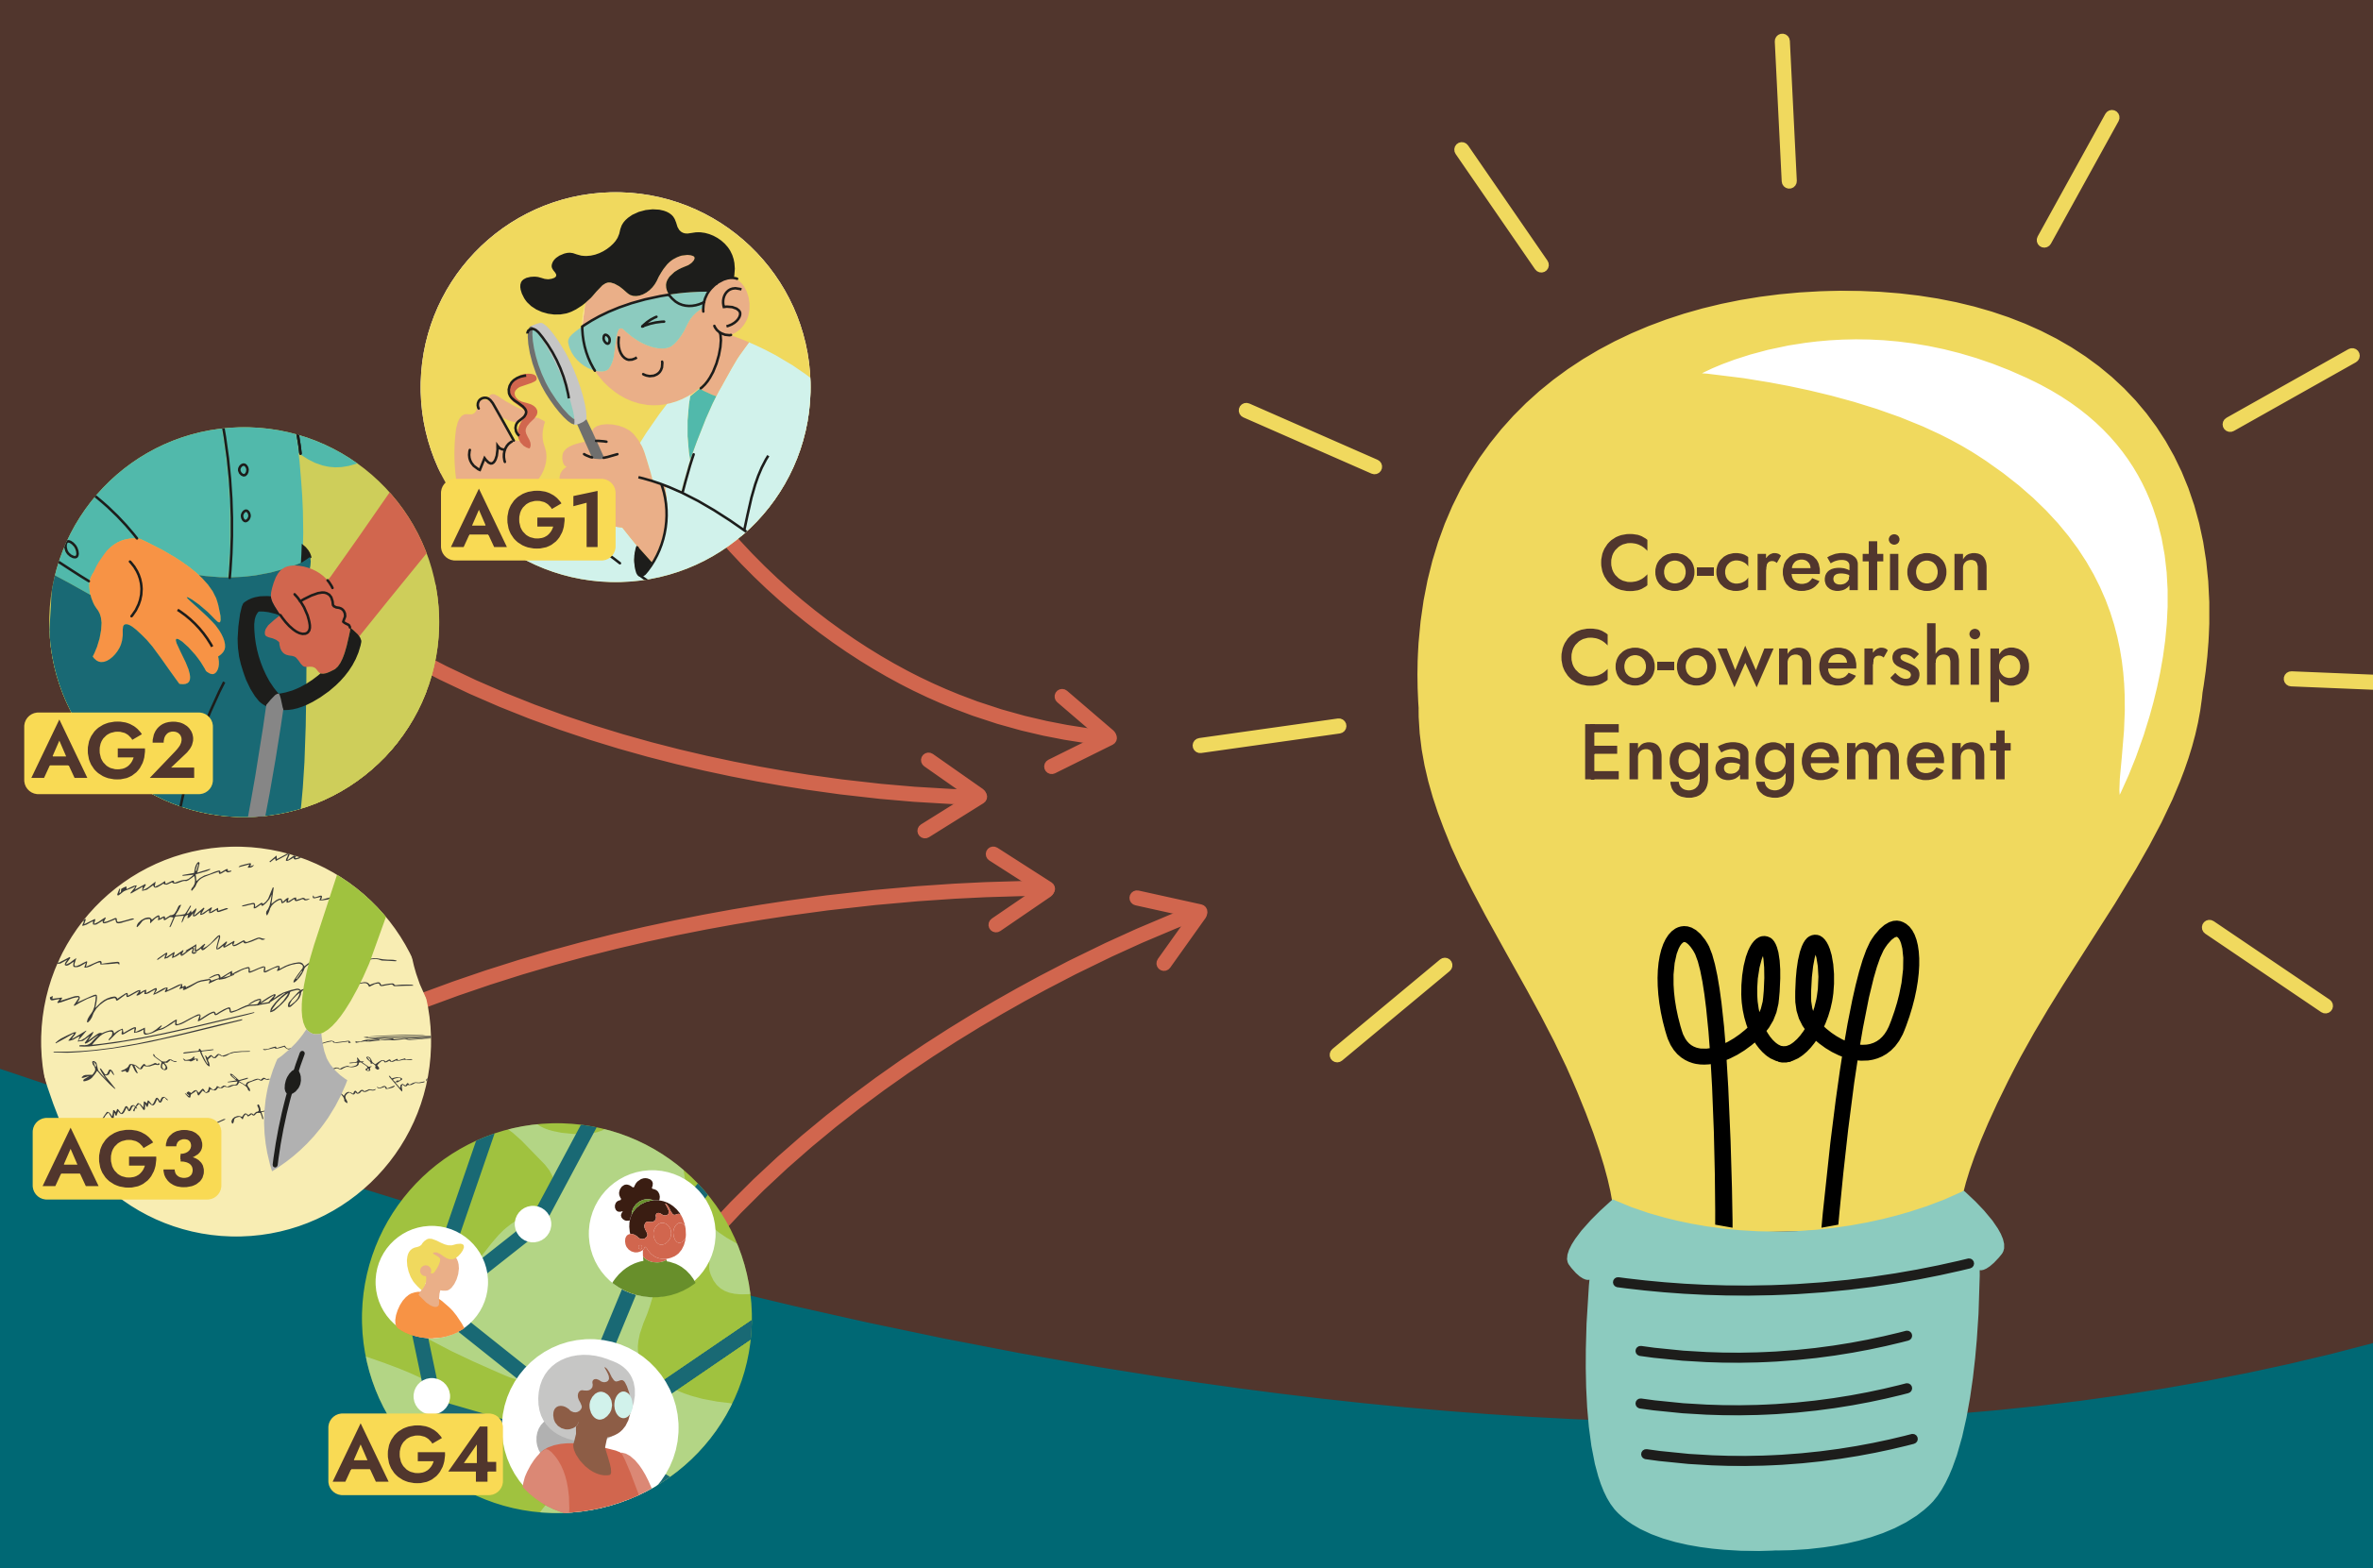

WHO? Farmers, landowners, cooperatives, biodiversity experts, economists, sociologists, climatologists, agronomists, data scientists, and policy and conservation experts, Community leaders, laboratories, Government Agencies and Intergovernmental Organizations

HOW? Groups having their own engagement strategy, objectives, targeted stakeholders, and methodologies. They actively seek and encourage participation and interaction of diverse key actors to achieve their mission during the project lifespan and promote it beyond the project within their sphere of action.

- AG1: Cross-biome Network of Sites
- AG2: Community of Practice
- AG3: Soil Biodiversity Conservation and Policy recommendations
- AG4: Global Soil Assessment Initiatives

CURIOSUS? Here is how you can become a SOILGUARDIAN!

AG1: Cross-biome network of sites —Unveiling the Hidden World

- What:** Share your knowledge and experience about your land. Share your challenges with us. Collect data on your soil's health with the help of scientists.
- Focus:** Understanding the current state of soil biodiversity across Europe.
- Benefits:** Contribute to groundbreaking research and develop innovative solutions for healthy soil.

AG2: Community of Practice

- What:** This where your role is most important! Collaborate with other farmers and cooperatives to share best practices for soil conservation and avoid your land's degradation on the long term. Discover all the different ways nature contributes to our wellbeing. Learn how to best take care of it in your specific area.
- Focus:** Building a community dedicated to soil health and maximizing the benefits it provides.
- Benefits:** Learn new techniques and contribute to developing a valuable App for soil management.

AG3: Shaping Policy for a Sustainable Future

- What:** Help us understand what are the barriers for policy implementation. Co-create recommendations for policy changes that support soil health.
- Focus:** Developing solutions to improve soil conservation policies.
- Benefits:** Help shape future policies that ensure healthy soil for generations to come.

AG4: Connecting Globally for Soil Health

- What:** Keep building connections and giving us your feedback. Share your learnings with others around the world.
- Focus:** Contributing to a worldwide network dedicated to soil health and biodiversity.
- Benefits:** Be a part of a global movement and help ensure healthy soil for the planet.
